

Rack Mounted Systems

Portable Compressor Desiccator Unit 6202

This unit is ideally suited to provide a supply of clean dry air at low pressure for use in pressurising antenna systems, waveguides and communications cables. The unit is contained within a rigid steel frame.

Specifications:

- Dry air output to better than -40° Celsius.
- Digitally controlled alarms and wet air by-pass fail-safe.
- Oil-less air compressor.
