

Medium Installations

Waveguide Dehydrator Unit 6250 MKII Ship Mount

This unit is ideally suited to provide a supply of clean dry air at low pressure for use in pressurising antenna systems, waveguides and communication cables. This unit is contained within a rigid steel frame.

Specifications:

- Oil-less air compressor.
- Power Supply: 110/115 VAC 60Hz.
- Dry Air Output: Free air delivery of 25 liters per minute.
- Output Pressure: Factory preset to customer requirements.
- Dewpoint: Better than -40 degrees Celsius.
- Wet/Dry Bypass: Fail-safe solenoid valve controlled by a humidity detector.
- Alarms: Includes compressor total running hours, output dewpoint (LED), output pressure (LED), low output pressure, high humidity, and mains fail alarms.
- Dimensions: Height 600mm, Width 500mm, Depth 300mm.
